Experience

Thoughtworks

2021 - Present

I currently serve as a Senior Consultant at Thoughtworks, where I play an active role in both application development and technical leadership. My responsibilities span across development, infrastructure management, business analysis, and client engagement.

This role demands a strong focus on technical analysis, delivery planning, and providing tailored consultation to a diverse range of clients, ensuring the successful alignment of technical solutions with business objectives.

QMetry, Infostretch

2017 - 2021

I contributed as a Senior Software Engineer and Technical Leader at QMetry, where I was responsible for product feature development, Level 1 (L1) support, client communication, and technical leadership.

A significant part of my role was dedicated to developing new features for the QMetry for JIRA plugin, which required in-depth knowledge of the JIRA platform and its integrations. My involvement in L1 support entailed engaging with users worldwide to understand, triage, and resolve issues, ensuring a seamless product experience.

Spec India

2014 - 2017

I worked as a Software Engineer and later as a Senior Software Engineer, primarily contributing to the development of new applications in the education domain.

This role required active participation in technical discussions with clients, focusing on design and development decisions aimed at improving practices and enhancing overall code quality.
